Venus flytrap 'Dionaea muscipula 'Mars' starter' (CarniVFT42a)

Dionaea muscipula 'Mars' 'Starter'

€ 25.45

The Dionaea muscipula ‘Mars' ‘Starter' is a young plant of this Venus fly-trap mutant species which has been potted in a small 5-centimetre container. Araflora has herself selected the Dionaea muscipula ‘Mars' ‘Starter' with its extraterrestrial characteristics for further cultivation. You see the Dionaea muscipula ‘Mars' ‘Starter' is a Venus fly-trap mutant with exceptionally thin traps which gradually change into stalks. Its teeth resemble a blunt saw and its traps are placed at an unusually small angle. Despite its unique characteristics the Dionaea muscipula ‘Mars' ‘Starter' still needs plenty of light and water like all the other Venus fly-trap mutants. Rest during the winter is an important part of its upkeep and do not panic when large parts of the plant die off during the winter season.

Plantcare

No plantcare information of Araflora available. The plantcare symbols below will give you an indication about the product. We hope to have text available soon.

Care:
normal

Place:
indoor

Place:
container plant

Place:
artificial lighting

Light:
full light

Artificial light height:
0-20cm

Fertilize:
none

Maintenance:
prune dead stalks

Watering:
high

Watering tips:
standing in water

Watering tips:
no-water spraying

Air humidity at day:
60-100%

Air humidity at night:
80-100%

Air movement:
normal

Day temperature
15-25°C

Night temperature
10-20°C

Temperature max:
30°C

Temperature min:
10°C

Soil ph:
< 6

Soil type:
peat

Repotting:
after 2 years
