Peperomia pecuniifolia (Pepe22)

Peperomia pecuniifolia

€ 15.17

Peperomia pecuniifolia is a great example of an easy plant which will feel right at home in the house or in a tropical terrarium. Provide Peperomia pecuniifolia with the option to climb and hang. This way, your terrarium and paludarium will have a natural look. Peperomia pecuniifolia is also well-suited for a dryer terrrarium.

Product info

Peperomia pecuniifolia is originally found in western Guatamala. In this area, this plant grows in semi-moist and moist forests. Its thick leaves make it resistant against dry spells, as the leaves can store moisture. Peperomia pecuniifolia can be kept in terrariums with, for example, poison dart frogs and medium-large lizards.

Height: 10 cm	Width: 5 cm
Adult height: 100 cm	Adult width: 40 cm
Flower period: all year	Temperature winter: 5 °C
Product: plant	Plant type: terrarium
Growth habit: creeping	Properties: special
Growth rate: normal	Araflora info: limited
Natural habitat: South America	Altitude range: 0-1000 m

Plantcare

Peperomia pecuniifolia requires a bright spot. We recommend spraying it a few times a week (with osmosis water, for example). If Peperomia pecuniifolia receives sufficient warmth, light and moisture, it will grow quickly. Preferably this plant is placed on an epiphyte branch or a (moisture retaining) backwall of the terrarium. Make sure the roots are always moist. This plant is simple to prune. Extra fertilization is not directly required.

Care: easy	Place: indoor
Place: artificial lighting	Light: semi sun
Protection: watering from above	Fertilize: medium
Watering: normal	Watering tips: watering from above
Watering tips: water spraying	Air humidity at day: 60-90%
Air humidity at night: 70-90%	Air movement: normal
Temperature max: 35 °C	Temperature min: 5 °C
Soil type: mixed	Repotting: after 1 year
