Product info

The exotic plant, the Euphorbia bupleurifolia looks strange and unusual in appearance. Its leaves grow on top of a broad stem, which looks like a sort of large pine cone. Those leaves are long and become broader towards the tip. The Euphorbia bupleurifolia is native to South Africa. This exotic plant is easy to care for, since it can stand drought and requires little maintenance. This Araflora plant is well-suited to being kept in a living room or office.

Plantcare

The tropical plant, the Euphorbia bupleurifolia is easy to care for. It prefers a spot in half shadow and needs little watering. During the growing season it requires a moist soil; on the other hand in the period when there is no growth, the soil must stay dry. The temperature should not drop below 10°Celsius [50°F], therefore the Euphorbia bupleurifolia in Holland is mainly grown indoors, at home or in the office. The substrate for the Euphorbia bupleurifolia should be permeable with not too much organic matter. Araflora sells potting soil that has been especially developed for tropical plants like the Euphorbia bupleurifolia. Do not consume this plant; it is poisonous.
