

Sagopalm 'Cycas revoluta 'S' (Paex13)

Cycas revoluta 'S'

€ 28.00

Cycas revoluta (sago palm) is one of the most well-known species of Cycas. Indestructible as a houseplant. With minimal temperature and water requirements it is a plant that can grow very old. As a young plant, Cycas revoluta can be a pot plant, later in life it can grow into a tree with a low trunk.

Plant type:

foliage plant

Place:

indoor

Adult width:

40 cm

Light:

full light

Watering:

normal

Araflora info

limited

Product info

Cycas revoluta can be found in Japan, Madagascar and in Indonesia, Malaysia, India and Sri Lanka. This palm is called a 'living fossil', because little or nothing has changed on the plant since prehistoric times. The Cycas has survived dinosaurs and defied several ice ages. It is said that they can live up to 1000 years.

Height:

30 cm

Width:

10 cm

Adult height:

100 cm

Adult width:

40 cm

Flower colour:

white/yellow

Flower period:

all year

Temperature winter:

5 °C

Product:

plant

Plant type:

foliage plant

Growth habit:

normal

Properties:

botanical

Growth rate:

normal

Araflora info:

limited

Natural habitat:

Australia/ New Zealand

Altitude range:

0-1000 m

Plantcare

Cycas revoluta is an easy plant to keep. The Cycas can go outside during the summer, spring and autumn, out of bright sunlight, otherwise the plant will turn yellow (until new leaves have appeared). When the temperature drops below -4°C the plant needs to be brought in. Water the plant regularly. A spot in the shade or partial shade will suffice as a site.

Care:
easy

Place:
indoor

Place:
container plant

Light:
full light

Light:
semi sun

Fertilize:
medium

Maintenance:
can be pruned

Watering:
normal
