

Biophytum sensitivum 'Medium plant' (Terra3a)

Biophytum sensitivum 'M'

€ 6.94

A nice plant which responds to touch like the Mimosa Pudica. This miniature palm-like plant grows to a height of some 10 to 15 cm and its leaves close in as a response to touch, or at nighttime. It resembles a mini palm tree because the leaves are in a crown on top of a wood-like stem. It is an easy plant to cultivate not needing much light and certainly not direct sunlight. It does well at room temperature and its soil should be kept moist. The seeds germinate easily on moist soil.
