Product info

The Vriesea correia-araujoi belongs to the bromelia family. In the tropical forests of Brasil it grows as an epiphyte. Under cultivation the Vriesea correia-araujoi thrives in home, office or tropical terrarium. Its leaves are very narrow and grow from the centre of the plant. When the Vriesea correia-araujoi comes into flower it produces a long stalk from the middle of the coronal of leaves. From this stalk grow bright-red, flower-like leaves with a yellow tip. The actual flower can be found within these leaves. This exotic plant remains relatively small, maximum circa 30 centimetres in height.

Height: 14 cm		Width: 10 cm	
Adult height: 60 cm		Adult width: 40 cm	
Flower period: Mar-June		Temperature winter: 10°C	
Product: plant		Plant type: flowering plant	
Plant type: terrarium		Growth habit: normal	
Properties: non-edible		Growth rate: normal	
Araflora info: limited		Natural habitat: South America	
Altitude range: 500-1500 m			

Plantcare

The bromelia species, *Vriesea correia-araujoi*, is an easy-care plant. This exotic plant prefers to be in a light spot or in half shadow. However, direct sunlight can cause damage. Keep the soil moist but avoid stagnant water near the roots. This species is not hardy, but for the rest it can stand a wide range of temperatures. A mix of peat and potting soil may be selected as substrate. There is no need for much fertilizer: Araflora produces good results by giving the plant nutrition for orchids once every three months.

Care: normal		Place: indoor	
Place: container plant		Light: semi sun	
Artificial light height: 20-40 cm		Protection: water spraying	
Fertilize: much		Maintenance: prune dead stalks	
Watering: high		Watering tips: free draining mixture	
Watering tips: watering from above		Watering tips: not standing in water	
Soil type: terrarium		Air humidity at day: 50-75%	
Air humidity at night: 70-90%		Air movement: normal	
Temperature <20°C		Day temperature 25-35°C	
Night temperature 5-20°C		Temperature max: 30°C	
Temperature min: 20°C		Soil ph: < 5-6>	
Soil type: peat		Repotting: after 2 year
