

Venus flytrap 'Dionaea muscipula' 'Opus delight' (CarniVFT45)

Dionaea muscipula 'Opus delight'

€ 0.00

Dionaea muscipula 'Opus delight' deserves to be near the top of any 'must buy' list of unusual and attractive Venus flytraps. It has exceptionally long teeth on both edges of its strikingly shaped leaf lobes. Dionaea muscipula 'Opus delight' will amaze and delight anyone who sees it.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

non-edible

Product info

Venus flytraps are carnivorous plants that come originally from North America where they grow in poor soil and boggy conditions. Their response to the lack of nutrients has been to provide their own food. Prey such as insects and spiders, attracted by the plants' vivid colours and fragrance, are caught in the hinged lobes of the leaf trap.

Height:

3 cm

Width:

3 cm

Adult height:

5-10 cm

Adult width:

10 cm

Flower colour:

Plantcare

Dionaea muscipula 'Opus delight' likes boggy soil and exposure to direct sunlight. Venus flytraps do not need feeding as they obtain the nutrients they require from their prey. The growing medium must be kept wet with rainwater, boiled water or demineralised water.
