

Monstera obliqua (Ariods32)

Monstera obliqua

€ 11.99

The Monstera obliqua is an easy-care plant for home or office. It thrives in the sun or half shadow, but bright, direct sunlight must be avoided. The Monstera obliqua needs a lightly moist soil, but does not like 'wet feet'. A container or hanging basket from which the water can drain at the bottom, is a good solution. The Monstera obliqua thrives in hanging- or tall containers, so the leaves room can hang down over the edges. Araflora has various matching containers in its assortment.

Product info

The Monstera obliqua is a beautiful plant with large green leaves. These leaves have large, remarkable holes, which have grown of their own accord. So these holes are not caused by insects, disease, or a flaw in the plants' development. It are these that give the plant its unique and striking appearance. The Monstera obliqua is native to the tropical forests of Brasil. Indoors the Monstera obliqua is an excellent plant in the home or in the office and is really easy to cultivate. This plant always remains modest in size, but can in the wild climb up many metres on other plants. Lora

Height:
