Product info

Utricularia minutissima 'Gunung Tahan' has a peculiar habitat. Up on the highest mountain of the Malaysian peninsula in the oldest rainforest on earth. With its small lilac flowers it brings colour to the moist ground. Dozens of flowers grow from long, slightly curled, flower stems. Utricularia minutissima 'Gunung Tahan' has a pack of small dark green leaves, hiding the traps it uses to catch its prey.

Natural habitat:
North America

Altitude range:
0-500 m

Plantcare

Utricularia minutissima 'Gunung Tahan' needs a relatively light stop. A high humidity and a temperature around 25°C are also of the essence, as this species usually resides in the mountains. Keep the substrate nice and moist with rainwater or distilled water. This substrate is ideally a mixture of peat moss and perlite or pumice. You can find this and other components in our 'Plant Accessories' section. Put the leaves under a layer of water regularly, making sure it is able to drain from it to prevent infections. It is also possible to keep *Utricularia minutissima* 'Gunung Tahan' under a bell jar, if you make sure it gets some fresh air regularly.
