Product info

The plant Pachypodium lamerei is also called madagascarpalm, because this species from Madagascar looks a bit like palm tree. As matter of fact this sort is no family of the palms. The Pachypodium lamerei has a straight stem with spines and on the top of its stem grows a large cluster of green leaves. The Pachypodium lamerei is a popular Pachypodium species because it is easy to keep and looks so special.

Plantcare

The exotic plant, the Pachypodium lamerei is easy to care for and can best be treated as a type of cactus. It prefers a light spot and high temperatures. Therefore keep this type of plant at a temperature above 15° Celsius [50° F] to a maximum of 35° Celsius [95° F]. During its growing season the Pachypodium lamerei is not adverse to some water, but in general a dry soil is best. An ordinary cactus-mix can be used as potting soil. Once a month during the growing season the Pachypodium lamerei may be given a little plant food. Arafloa sells diverse products for the Pachypodium lamerei, like soil, plant food and pots.
