

Columnnea sanguinea (Gesn10)

Columnnea sanguinea

€ 16.35

The Columnnea sanguinea, "Orange King" is an easy-care exotic plant. It prefers to be in the light but not in full, direct sunlight. To provide the plant with moisture it is best placed in a saucer with water. The Columnnea sanguinea thrives in relatively high humidity, so a saucer with water or an occasional spraying with a siphon is a good idea. This plant can stand all temperatures prevalent in home or office from a minimum of 10° Celsius [50° F] upwards. The Columnnea sanguinea needs a soil that is permeable and provides sufficient nutrition. Araflora sells all kinds of soil mixtures also for the exotic Columnnea species.
