40 cm

Adult width:

10 cm

Flower period:

all year

Product:

plant

Plant type:

flowering plant

Growth habit:

climbing

Growth habit:

epiphytical

Properties:

limited

Growth rate:

normal

Araflora info:

botanical

Natural habitat:

North-East Asia

Altitude range:

0-1000 m

## Plantcare

In the wild *Ludisia discolor* grows in shady areas in cloudy forests. Although temperatures feel tropical there, the orchid is not used to a lot of light. The orchid can grow on both earth and rocky surface, as long as it is in the proximity of a river. A steady supply of water is therefore necessary. Offer plenty of shadow and a high humidity . With a night temperature averaging between 22-28 degrees Celsius *Ludisia discolor* grows optimally. During the day the temperature can be even 5 degrees warmer.
