

Orchid 'Oncidium meirax' (Orchid110)

Oncidium meirax

€ 0.00

It looks like the flower of *Oncidium meirax* is wearing a feather headdress. Three flower petals appear as a clover above the lip. The colour of the orchid is greenish yellow with brown specks. The flowers are quite small, but will stay attached to the plant for a long time. In the wild this orchid is found on the islands in the Caribbean Sea and South America. The size of *Oncidium meirax* makes it perfect for your terrarium!

Product info

Oncidium meirax is widespread in Central and South America. It is found in Puerto Rico, the Dominican Republic, Venezuela, Colombia, Ecuador and Peru at altitudes between 600 and 2.000 meters. The flower stalks stick out above the leaves arising from slightly flattened bulbs. *Oncidium meirax* can grow multiple flower stems with each carrying multiple flowers. These are 1,5 centimetre with a very large yellow lip compared to the rest of the flower, with brown specks.

Height: 5 cm		Width: 5 cm	
Adult height: 40 cm		Adult width: 10 cm	
Flower period: all year		Product: plant	
Plant type: flowering plant		Growth habit: climbing	
Growth habit: epiphytical		Properties: limited	
Growth rate: normal		Araflora info: botanical	
Natural habitat: South America		Altitude range: 0-1000 m	

Plantcare

Oncidium meirax is naturally found in mountainous areas, resulting in an orchid which can handle lower temperatures than others. During the day a temperature of 20°C is ideal, dropping to 12°C at night. Temperatures below 5°C and above 25°C can be too much for the orchid. This type needs a lot of light, but should be kept out of direct sunlight at all times, to prevent it from drying out. The humidity of the habitat of Oncidium meirax should be 80% and slightly more at night. Water with a lot of rainwater or distilled water in the blossoming periods and less in the periods of rest. Proper airflow combined with a proper humidity will help prevent infections and disease. Oncidium meirax can be kept in a pot with shreds of bark or attached to a piece of bark with moss. You can find this and other components in our 'Plant Accessories' section. Fertilize the orchid every now and then. Old flowers can be cut from the plant.

Care:
easy

Place:
indoor

Place:
artificial lighting

Light:
no direct sun

Light:
semi sun

Fertilize:
medium

Maintenance:
can be pruned

Watering:
normal

Watering tips:
not standing in water

Air humidity at day:
60-90%

Air humidity at night:
70-90%

Air movement:
large

Temperature max:
30 °C

Temperature min:
15 °C

Soil ph:
< 6-7 >

Soil type:
mixed

Repotting:
after 1 year
