

Sphagnum moss (Moss10)

Sphagnum moss

€ 17.44

One of the biggest problems with keeping tropical plants is that some species are prone to drying out. Sphagnum moss is the solution for this. The green layer helps to retain moisture in many substrates. For example, Sphagnum moss is often used for orchids, pitcher plants and Utricularia species. You will also receive this moss alive, which gives it a beautiful green color.

Plant type:

foliage plant

Place:

indoor

Adult width:

Product info

Sphagnum moss grows very well in combination with peat. Together they ensure optimal water retention. The moss ensures that the plants in your terrarium remain healthy. Don't forget that it also looks very nice. You will be sent a quantity of moss that will quickly grow into a true green carpet.

Height:

25 cm

Width:

25 cm

Temperature winter:

5 °C

Product:

plant

Plant type:

foliage plant

Plant type:

terrarium

Growth habit:

creeping

Growth habit:

epiphytical

Properties:

limited

Growth rate:

normal

Araflora info:

mini

Natural habitat:

World wide

Altitude range:

0-1000 m

Plantcare

Sphagnum moss is very easy to care for. It is advisable to keep the moss around moisture-loving terrarium plants. You can assume that the plant surrounding the moss will have the same needs as the moss. You must ensure that the temperature does not fall below 15°C or rise above 30°C at all times, 23°C is optimal for the moss. Keep the moss moist by spraying it with rain or distilled water. Sphagnum moss needs a few hours of light per day, but be careful with too direct sunlight.
