Plantcare

The *Alocasia cucullata* is an easy plant to cultivate. It thrives in a place with a lot of light but also in half shadow. If this plant is placed in direct sunlight the leaves will turn yellow. Keep the potting soil around this plant really moist: this species likes 'wet feet'. As long as the plant is cultivated indoors the *Alocasia cucullata* makes few demands on the temperature [10°-30°Celsius / 50°- 86°F]. If from time to time you add some liquid fertilizer the *Alocasia cucullata* will continue to grow. Araflorea sells many different types of soil and also containers for this plant. The plantcare symbols below will give you additional indication about the *Alocasia cucullata*.
