

Venus flytrap 'Dionaea muscipula 'Mars' starter' (CarniVFT42a)

Dionaea muscipula 'Mars' 'Starter'

€ 25.45

The *Dionaea muscipula* 'Mars' 'Starter' is a young plant of this Venus fly-trap mutant species which has been potted in a small 5-centimetre container. Araflora has herself selected the *Dionaea muscipula* 'Mars' 'Starter' with its extraterrestrial characteristics for further cultivation. You see the *Dionaea muscipula* 'Mars' 'Starter' is a Venus fly-trap mutant with exceptionally thin traps which gradually change into stalks. Its teeth resemble a blunt saw and its traps are placed at an unusually small angle. Despite its unique characteristics the *Dionaea muscipula* 'Mars' 'Starter' still needs plenty of light and water like all the other Venus fly-trap mutants. Rest during the winter is an important part of its upkeep and do not panic when large parts of the plant die off during the winter season.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

non-edible

Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height:

1 cm

Width:

1 cm

Adult height:

5-10 cm

Adult width:

10 cm

Flower colour:

white

Flower period:

Jan-July

Temperature winter:

5°C

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:
special

Araflora info:
non-edible

Growth rate:
slow

Araflora info:
limited
