Product info

Begonia pavonina is a striking plant which in nature is only found in a few tropical mountainous forests in Asia, which due to their great altitudes are relatively cool on the tropic scale. The extraordinary iridescent characteristic of the leaf is primarily visible when the light hits it at just the right angle. In deep shadow and in natural light the leaf will develop more iridescent power. A drop in night temperature also has a beneficial influence. Due to this Begonia'S predisposition towards very high humidity a terrarium or greenhouse is recommended. In bloom the Begonia pavonina has light pink flowers. It is a rhizome-forming Begonia.

Height:
5 cm

Width:
5 cm

Adult height:
40 cm

Adult width:
20 cm

Flower colour:
purple/white

Flower period:
all year

Product:
plant

Plant type:
foliage plant

Plant type:
terrarium

Growth habit:
normal

Properties:
non-edible

Growth rate:
slow

new

Natural habitat:

Central America

Altitude range:
500-1000 m

Plantcare

Make sure humidity is high, temperatures are relatively low '14-23 degrees Celsius' and light is scarce 'Partial to deep shade'. Constant high temperatures are not healthy for this plant.

Care:
easy

Place:
indoor

Light:
no direct sun

Light:
semi sun

Protection:
protect against rainfall

Fertilize:
little

Maintenance:
no-pruning

Watering:
normal

Watering tips:
standing in water

Soil type:
terrarium

Air humidity at day:
60-80%

Air humidity at night:
80-100%

Temperature
< 15 °C

Day temperature
10-30 °C

Night temperature
12-18 °C

Temperature max:
30 °C

Temperature min:
10 °C

Soil ph:
< 5-7 >

Soil type:
peat mix

Repotting:
after 1 year
