

Bromeliad 'Tillandsia dyeriana' (Brom112)

Tillandsia dyeriana

€ 9.06

This striking exotic plant is easy to care for. Tillandsia is suitable for the terrarium or on a bright windowsill. The Tillandsia dyeriana's flower is a bright orange. Only a few spots in the mangrove forests of West-Ecuador remain home to these Bromelia. Especially poison dart frogs will feel at ease between the bracts of this plant and may lay their eggs there.

Product info

Because Tillandsia dyeriana doesn't grow too large, this plant is easy to keep in a somewhat smaller terrarium. The inflorescence is nothing short of spectacular, featuring bright orange bracts interspersed with small white flowers. The outside of this Bromelia's green leaf is often covered with dark spots. The plant can be placed in the soil, but really comes into its own in its natural style of growth: epiphytically. The plant can be placed on the back wall (preferably a fern root or other absorbent material) or set on an epiphyte trunk. Many small poison dart frogs species like hiding between the leaves of this Bromelia in order to lay eggs. Moreover, Tillandsia dyeriana can also be kept in the living room as a houseplant.

Height: 15 cm		Width: 10 cm	
Adult height: 15 cm		Adult width: 10 cm	
Flower colour: white		Flower period: all year	
Temperature winter: 10°C		Product: plant	
Plant type: flowering plant		Plant type: terrarium	
Growth habit: normal		Properties: non-edible	
Growth rate: normal		Araflora info: limited	

Natural habitat:
South America

Altitude range:
0-500 m

Plantcare

In a tropical terrarium this small to medium-sized Bromelia requires a bright spot with high humidity. Preferably, there should always be water in the chalice of Tillandsia dyeriana. If the roots become too moist they'll quickly die off. Daily misting is recommended. Extra fertilization is not directly required.

Care: normal		Place: indoor	
Place: container plant		Light: semi sun	
Artificial light height: 20-40 cm		Protection: water spraying	
Fertilize: little		Maintenance: prune dead stalks	
Watering: high		Watering tips: free draining mixture	
Watering tips: watering from above		Watering tips: not standing in water	
Soil type: terrarium		Air humidity at day: 80-100%	
Air humidity at night: 60-80%		Air movement: normal	
Day temperature 15-30°C		Night temperature 15-20°C	
Temperature max: 30°C		Temperature min: 20°C	
Soil type: peat		Repotting: after 2 years
