

## Antplant 'Dischidia ovata' (Antp09)

Dischidia ovata

€ 16.35

Dischidia ovata is one of the most popular Dischidias due to its pretty striped leaf. The hollow leaves are reminiscent of small watermelon, which is why the plant is colloquially known as the 'Watermelon plant'. When the plant is in bloom, the cute tiny flowers give it extra appeal.

Plant type:

plant

35 cm

Adult width:

80 cm

Flower colour:

purple

Flower period:

all year

Product:

plant plug

Plant type:

plant

Plant type:

terrarium

Growth habit:

creeping

Growth habit:

epiphytical

Growth rate:

normal

Araflora info:

non-edible

Araflora info:

botanical

Natural habitat:

South-East Asia

Altitude range:

0-1500 m

## Plantcare

Give this exotic plant a modest amount of water, once every two or three days is plenty. Let the soil go 'Nearly' dry in between watering sessions. Use a properly porous medium, such as orchid mix. This plant thrives under high humidity. Bright, indirect, filtered light is optimal. When placed in a terrarium, the amount of light should be medium to intense. Under intense light, the the leaves will turn more red. When dry, the leaves will become more succulent 'Harder'.

Care: normal		Place: indoor	
Place: artificial lighting		Light: full light	
Light: semi sun		Artificial light height: 20-40 cm	
Fertilize: little		Maintenance: can be pruned	
Watering: normal		Watering tips: free draining mixture	
Watering tips: not standing in water		Watering tips: water spraying	
Soil type: terrarium		Air humidity at day: 60-80%	
Air humidity at night: 80-100%		Air movement: normal	
Temperature < 15 °C		Day temperature 20-30 °C	
Night temperature 12-18 °C		Temperature max: 30 °C	
Temperature min: 10 °C		Soil ph: < 6-7 >	
Soil type: peat/cocos		Repotting: after 2 years
