

Pilea glauca (Terra65)

Pilea glauca

€ 8.18

The exotic plant Pilea glauca is a tropical plant which makes an especially pretty leaf. The leaves are very small but great in numbers. The stalks with leaves grow as a sphere from the pot and the plant can also have hanging offshoots. Pilea glauca plants can be easily kept in a windowsill or lit terrarium.

Product info

The Pilea glauca plant has a striking appearance due to its many small leaves. The large amount of leaves cause the plant to grow as a sphere from the pot. In the office or at home in the windowsill Pilea glauca is a nice sight to see. In a tropical terrarium with for example poisonous frogs, this plant is ideal. It will covers the floor and wall providing a natural appearance to the terrarium. It also offers a hiding place for the animals. Caring for Pilea glauca is simple. The symbols below will give you some indications for this plant.

Plantcare

Put *Pilea glauca* in a bright spot, but not in direct bright sunlight. In a terrarium *Pilea glauca* can get by with artificial light. Make sure the terrarium is moist. Water the plant about 2 or 3 times a week, making sure the soil remains moist. Water should not stand at the roots for too long, as it can cause them to rot. *Pilea glauca* isn'T picky about soil types, choose a normal porous potting soil. Adding some plant nutrition to the water once every month promotes the growth. Araflora also offers other types of *Pilea*, please take a look at our other *Pilea* variants. The plantcare symbols below will give you an indication about the product.
