

Venus flytrap 'Dionaea muscipula 'Pacman' starter (CarniVFT46a)

Dionaea muscipula 'Pacman' starter

€ 15.73

The *Dionaea muscipula* 'Pacman' 'Starter' , a young, finely-rooted cutting of this unique Venus fly-trap mutant species grown in a 5-centimetre pot. Within the traps a soft-red colour may develop and also many 'trigger'-hairs are to be found there. This rare Venus fly-trap mutant does not have the typical sharp teeth of the other Venus fly-traps but instead the *Dionaea muscipula* 'Pacman' 'Starter' has undulating, blunt ones. Araflora has given the name 'pacman' to the *Dionaea muscipula* 'Pacman' 'Starter' because one can imagine these traps with their blunt teeth looking similar to that small yellow figure eating its way through your screen. Place the *Dionaea muscipula* 'Pacman' 'Starter' in a light spot and give it sufficient water in order to create the best conditions for growth.
