

Venus flytrap &#039;Dionaea muscipula &#039;Freaky star&#039; starter&#039; (CarniV  
 Dionaea muscipula &#039;Freaky star&#039; starter

€ 20.31

The Dionaea muscipula &#039;Freaky star' &#039;Starter' with its fine-meshed root-system in a 5-centimetre pot is a smaller version of this Venus fly-trap mutant. The Dionaea muscipula &#039;Freaky star' &#039;Starter' originates from Europe, but looks more like it has come from a far, undisturbed region where the craziest mutations can take place. The Dionaea muscipula &#039;Freaky star' &#039;Starter' owes its name to two unique external features: The Dionaea muscipula &#039;Freaky star' &#039;Starter' is because of its unique appearance a real star among the Venus fly-traps ..... with a bizarre edge. . First of all the traps are star-shaped and have thick, fleshy edges lined with rows of teeth in some cases even with double rows of teeth. Secondly the fleshy stalks sprout uncontrollably out of the soil winding their way pell-mell upwards.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

non-edible

### Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height:

2 cm

Width:

2 cm

Adult height:

5-10 cm

Adult width:

10 cm

Flower colour:

white

Flower period:

Jan-July

Temperature winter:

5°C

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:  
new

Araflora info:  
non-edible

Growth rate:  
slow
