

Venus flytrap 'Dionaea muscipula' 'Dentate' starter (CarniVFT2)

Dionaea muscipula 'Dentate' starter

€ 5.20

The *Dionaea muscipula* 'Dentate' is one of the first Venus fly-trap mutants with those smaller, triangular sawteeth. The traps of this carnivorous plant can grow some 4 centimetres long and grow from stalks which themselves can grow upto a size of some 8 centimetres. When the *Dionaea muscipula* 'Dentate' is exposed to direct sunlight, even the outside of the trap can develop a beautiful red colour beside the already present red inside.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high
