

Philodendron scandens 'XL' (Ariods136)

Philodendron scandens 'XL';

€ 38.15

This exotic houseplant is a climbing plant that's easy to care for. The Philodendron scandens is a tropical plant with heart-shaped leaves which occurs naturally in the tropical rainforest. This Philodendron has beautiful large green leaves and does well at home or in the office. The Philodendron scandens is also ideal as vegetation in a terrarium with reptiles and amphibians.

Product info

The houseplant Philodendron scandens does well on a spot with lots of light, though it should be kept out of direct sunlight. A more shady location is also tolerated. Philodendron scandens likes a moist soil, but too much stagnant water can cause the roots to rot. Mist the plant regularly with water, as it likes high humidity. The ambient temperature for this type should be between 15 and 25 degrees Celsius. Philodendron scandens likes soil with little calcium; a coniferous soil mix is perfect. Araflora can help you find a suitable soil type for this plant.

Height:
15 cm

Width:
5 cm
