

Venus flytrap 'Werewolf' (CarniVFT102)

Dionaea muscipula 'Werewolf'

€ 49.05

The *Dionaea muscipula* 'Werewolf' is a mutant selected by Araflora. The plant was later named 'Werewolf' after the traps that remind one of the claws of the mythological werewolf. The teeth of the traps of this unusual Venus fly-trap are wide and taper into sharp tips pointing to all sides. Even though the *Dionaea muscipula* 'Werewolf' has no 'trigger'-hairs in its traps and therefore cannot be closed, yet the plant is a unique Venus fly-trap species growing notwithstanding if there is sufficient light and water. We are reproducing it now but it can take up to 2 years before we can sell this unique clone. So please do preregister with the out of stock option for this unique araflora Venus Flytrap clone.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

non-edible

Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height:
1 cm

Width:
1 cm

Adult height:
5-10 cm

Adult width:
10 cm

Flower colour:
white

Flower period:
Jan-July

Temperature winter:
5°C

Product:
plant

Plant type:
carnivorous

Growth habit:
normal

Properties:
new

Growth rate:
slow

Araflora info:
non-edible
