

Venus flytrap *Dionaea muscipula* 'Kubus trap' (CarniVFT113)

Dionaea muscipula 'Kubus trap';

€ 70.85

Dionaea muscipula 'Kubus trap' is a highly unusual cultivar. Unlike other Venus flytraps, *Dionaea muscipula* 'Cube trap' produces a number of leaves attached to one another on a single stalk, creating the shape of a cube.

Plant type:

carnivorous

Place:

indoor

Adult width:

4 cm

Light:

full light

Watering:

high

Araflora info

non-edible

Product info

There are numerous varieties of Venus flytrap. *Dionaea muscipula* 'Cube trap' is an exceptional cultivar variety produced in cultivation by selective breeding. Venus flytraps come originally from North America where they grow in poor soil in boggy areas. In the summer months, their leaf stalks grow longer so they can absorb maximum light in the dense vegetation which is their natural habitat.

Height:

1 cm

Width:

1 cm

Adult height:

5 cm

Adult width:

4 cm

Flower colour:

white

Flower period:

Jan-July

Temperature winter:

5°C

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:

introduction

Growth rate:

slow

limited

Plantcare

Dionaea muscipula 'Kubus trap' is best placed in direct sunlight. Its growing medium must be kept wet with rainwater, boiled water or demineralised water. Tap water is not advisable; it is normally full of minerals and therefore likely to produce root rot. Dionaea muscipula 'Kubus trap' can not close its leaf lobes but obtains sufficient nutrients from plenty of water and light.

Care:
difficult

Place:
container plant

Light:
full light

Fertilize:
none

Watering:
high

Watering tips:
no-water spraying

Air humidity at night:
80-100%

Day temperature
15-25°C

Temperature max:
30°C
