

Venus flytrap *Dionaea muscipula* 'Cudo'; (CarniVFT118)

Dionaea muscipula 'Cudo';

€ 19.62

At first sight the shape of the traps of the *Dionaea muscipula* 'Cudo' look somewhat like green cashewnuts with teeth. However, these traps are a lot more dangerous than the average cashewnut: by touching the 'trigger'-hairs the traps snap shut and the prey then has nowhere to turn. The *Dionaea muscipula* 'Cudo' is a small Venus fly-trap mutant, in other words a pygmy-variant of the Venus fly-trap. Because of its small size one should take great care over the winter rest of the *Dionaea muscipula* 'Cudo': it should not be too cold.

Plant type:

carnivorous

Place:

indoor

Adult width:

4 cm

Light:

full light

Watering:

high

Araflora info

non-edible

Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height:

1 cm

Width:

1 cm

Adult height:

5 cm

Adult width:

4 cm

Flower colour:

white

Flower period:

Jan-July

Temperature winter:

5°C

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:

introduction

Growth rate:

slow

Araflora info:

non-edible
