5-10 cm

Adult width:

10 cm

Flower period:

Jan-July

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:

special

Growth rate:

normal

Araflora info:

introduction

Natural habitat:

South Africa

Altitude range:

0-500 m

## Plantcare

The *Drosera aliciae* can take a lot. It grows best in a peat-perlite soil mixture or pure sphagnum (peat moss). This carnivorous plant can grow well in a terrarium, but can also thrive on the windowsill. If exposed to enough sunlight, it will change to a beautiful red colour. If its leaves are occasionally visited by an insect, the *Drosera aliciae* will bloom with flowers. These *Drosera* can tolerate higher temperatures, provided that the humidity is high enough (60-70%).

Care: normal		Place: indoor	
Place: artificial lighting		Light: full light	
Artificial light height: 0-20cm		Fertilize: none	
Maintenance: prune dead stalks		Watering: high	
Watering tips: standing in water		Watering tips: no-water spraying	
Air humidity at day: 60-100%		Air humidity at night: 80-100%	
Air movement: normal		Temperature 15°C	
Day temperature 15-25°C		Night temperature 10-30°C	
Temperature max: 30°C		Soil ph: < 7	
Soil type: peat		Repotting: after 2 years
