

## Anthurium gracile (Ariods11)

Anthurium gracile

€ 11.75

Anthurium gracile 'Red Pearl Anthurium' has small elongated leaves and a protective leaf-like curled bract or spathe ranging in colour from red to violet. After self-fertilisation, it produces a bunch of red berries from its purplish brown spadix. This plant is easy to care for, either in a terrarium or as an exotic houseplant in a location with plenty of light.

Plant type:

evergreen

foliage plant

Place:

indoor

Adult width:

<20 cm

Light:

no direct sun

Watering:

normal

Araflora info

special

### Product info

Anthurium gracile occurs in the wild in Central American countries such as Panama, Guatemala and Nicaragua. Its narrow leaves are between 10 and 30 centimetres long and 5 to 9 centimetres wide. The plant itself is 60 to 90 cm tall. ?Gracile? means graceful. Like Anthurium bakeri this plant pollinates itself which means that it automatically produces red berries once the spadix has finished flowering.

Height:

15 cm

Width:

8 cm

Adult height:

<80 cm

Adult width:

<20 cm

Flower colour:

white

Flower period:

all year

Product:

plant

Plant type:

foliage plant

evergreen

Plant type:

terrarium

Growth habit:

epiphytical

Growth habit:

normal

Properties:

non-edible

Growth rate:

normal

Araflora info:

special

Natural habitat:

South America

Altitude range:

0-1500 m

## Plantcare

Position Anthurium gracile in a bright spot but not exposed to full sun. Keep the potting mix slightly moist. Water often but in small quantities to make sure the potting mix stays moist but not soaking wet. Like most Anthuriums, Anthurium gracile likes humidity, so mist the plant every week. It like temperatures between 10 and 30 degrees Celsius. If desired, give it a little liquid fertiliser during the growing season. Try to plant in a potting mix consisting of 50% ordinary potting compost and 50% orchid mix or perlite.

Care: easy		Place: indoor	
Place: artificial lighting		Light: no direct sun	
Light: semi sun		Artificial light height: 20-40 cm	
Fertilize: little		Maintenance: can be pruned	
Watering: normal		Watering tips: free draining mixture	
Watering tips: water spraying		Soil type: terrarium	
Air humidity at day: 60-80%		Air humidity at night: 80-100%	
Temperature < 15 °C		Day temperature 10-30 °C	
Night temperature 12-18 °C		Temperature max: 35 °C	
Temperature min: 15 °C		Soil ph: <5-8>	
Soil type: peat		Repotting: after 1 year
