

## Orchid 'Dendrobium chrysotoxum' starter (Orchid256a)

### Dendrobium chrysotoxum starter

€ 0.00

You will get a starter plant of Dendrobium chrysotoxum in a 8 cm pot. In nature the orchid dendrobium chrysotoxum has bright yellow flowers which grow from the plant in large numbers. The lip is red with frills. It can vary extremely in colour, from light yellow to brown. The plant has a thickened stem from which multiple leaves and flower stems grow. This makes Dendrobium chrysotoxum a true colour explosion.

### Product info

The natural habitat of Dendrobium chrysotoxum is Northern India, Thailand, Myanmar, China, Laos, Vietnam, Bangladesh, Bhutan and Nepal. This beautiful orchid grows at altitudes from 400 to 1.600 meters. The orchid produces multiple leaves on its thickened stem. The leaves are quite long and have a pointy end. The flower stems are around 30 centimetre and can carry dozens of flowers each. The flowers of Dendrobium chrysotoxum have a honey yellow colour with a yellow or brown lip. The lip is round and has frills. Its colour betrays its sweet honey scent

<b>Growth habit:</b> epiphytical		<b>Properties:</b> limited	
<b>Growth rate:</b> normal		<b>Araflora info:</b> botanical	
<b>Natural habitat:</b> North-East Asia		<b>Altitude range:</b> 0-1000 m	

## Plantcare

Dendrobium chrysotoxum likes light, but should be kept out of direct sunlight. During winter this orchid should get slightly more light. The temperature should be around 20°C with slightly colder nights around 13°C. Make sure the temperature doesn't drop below 10°C or rise above 25°C. The preferred humidity is around 70%. Raising the humidity slightly at night stimulates the production of flowers. Water daily during spring and summer with rainwater or distilled water. Water less during autumn and even less during winter. This should be two times a week. Water should be able to drain from the substrate. Combined with a proper airflow you can prevent infections and disease. Orchid-mix is a suitable substrate, but it is also possible to attach the plant to a piece of bark. You can find this and other components in our 'Plant Accessories' section. Fertilize with caution. Old flowers can be cut from the plant.

Care:  
easy

Place:  
indoor

Place:  
artificial lighting

Light:  
no direct sun

Light:  
semi sun

Fertilize:  
medium

Maintenance:  
can be pruned

Watering:  
normal

Watering tips:  
not standing in water

Air humidity at day:  
60-90%

Air humidity at night:  
70-90%

Air movement:  
large

Temperature max:  
30 °C

Temperature min:  
15 °C

Soil ph:  
< 6-7 >

Soil type:  
mixed

Repotting:  
after 1 year
