Natural habitat:

North-East Asia

Altitude range:

0-1000 m

## Plantcare

In nature *Ludisia discolor alba* grows in shady areas in cloudy forests. Although temperatures feel tropical there, the orchid is not used to a lot of light. The plant can grow on both earth and rock surface, as long as it is in the proximity of a river. A steady supply of water is therefore necessary. Offer plenty of shadow and a high humidity . With a night temperature averaging between 22-28 degrees Celsius the plant grows optimally. During the day the temperature can be even 5 degrees warmer.

Care:  
easy

Place:  
indoor

Place:  
artificial lighting

Light:  
no direct sun

Light:  
semi sun

Fertilize:  
medium

Maintenance:  
can be pruned
