botanical

### Product info

Alocasia x calidora, also known as elephant ear or Taro, is an appealing houseplant with remarkable leaves. The leaves are large and green and have a shape reminiscent of a water lily. Some people see the shape of an elephant's ear in them. Alocasia occurs naturally in South-East Asia. As houseplant or at the office, this is a real eye catcher which is nonetheless easy to keep.

white

Flower period:  
all year

Product:  
plant

Plant type:  
foliage plant

Growth habit:  
normal

Properties:  
non-edible

Growth rate:  
slow

Araflora info:  
botanical

Natural habitat:  
South-East Asia

Altitude range:  
0-1500 m

## Plantcare

The elephant ear likes a bright spot, but can also grow in a partially shady spot. Direct sunlight doesn't benefit this type, as it will soon become too warm which can damage the leaves. *Alocasia x calidora* likes a moist soil and its roots should not dry out. So, water it regularly, for example with a dish under the pot. Mist the plant regularly to ensure higher humidity. In winter the plant absorbs less water. Keep the ambient temperature below 20 degrees Celsius. The soil must retain moisture and can be rich in nutrients. In the growth period the plant can be given nutrients once every two weeks to accelerate the growth. Araflora offers a variety of soil mixtures which are perfect for *Alocasia*.

Care:  
very easy

Place:  
indoor

Place:  
artificial lighting

Light:  
no direct sun

Light:  
semi sun

Artificial light height:  
20-40 cm
