Natural habitat:

Southern hemisphere

Altitude range:

0-500 m

Plantcare

The *Drosera felix* can be kept in either a peat-sand-perlite mix or in a sphagnum (peat moss)-perlite mixture. Like most South American species, it loves a high light intensity, high humidity and high daytime temperature (about 23 ° C). Ensure that the nighttime temperature drops to 15 degrees.

Care:
normal

Place:
artificial lighting

Artificial light height:
0-20cm

Maintenance:
prune dead stalks

Watering tips:
standing in water

Air humidity at day:
60-100%

Air movement:
normal

Day temperature
15-25°C

Temperature max:
30°C

Soil type:
peat

Place:
indoor

Light:
full light

Fertilize:
none

Watering:
high

Watering tips:
no-water spraying

Air humidity at night:
80-100%

Temperature
15°C

Night temperature
10-30°C

Soil ph:
<7

Repotting:
after 2 years
