

## Peperomia pecuniifolia (Pepe22a)

Peperomia pecuniifolia Starter

€ 9.27

Peperomia pecuniifolia is a great example of an easy plant which will feel right at home in the house or in a tropical terrarium. Provide Peperomia pecuniifolia with the option to climb and hang. This way, your terrarium and paludarium will have a natural look. Peperomia pecuniifolia is also well-suited for a dryer terrarium.

terrarium

Place:

indoor

Adult width:

40 cm

Light:

semi sun

Watering:

normal

Araflora info

limited

### Product info

Peperomia pecuniifolia is originally found in western Guatemala. In this area, this plant grows in semi-moist and moist forests. Its thick leaves make it resistant against dry spells, as the leaves can store moisture. Peperomia pecuniifolia can be kept in terrariums with, for example, poison dart frogs and medium-large lizards.

Height:

10 cm

Width:

5 cm

Adult height:

100 cm

Adult width:

40 cm

Flower period:

all year

Temperature winter:

5 °C

Product:

plant

Plant type:

terrarium

Growth habit:

creeping

Properties:

special

Growth rate:

normal

Araflora info:

limited

Natural habitat:

South America

Altitude range:

0-1000 m

## Plantcare

Peperomia pecuniifolia requires a bright spot. We recommend spraying it a few times a week (with osmosis water, for example). If Peperomia pecuniifolia receives sufficient warmth, light and moisture, it will grow quickly. Preferably this plant is placed on an epiphyte branch or a (moisture retaining) backwall of the terrarium. Make sure the roots are always moist. This plant is simple to prune. Extra fertilization is not directly required.
