

Sinningia leucotricha starter (Gesn39a)

Sinningia leucotricha flower

€ 0.00

One of the most striking flowering, tropical plants is the Sinningia leucotricha. Its leaves grow out of the tuber and develop into a star-shaped crown. On the upper side of the leaves grow white hairs and on top of these lie a great number of orange flowers.

Plant type:

flowering plant

Place:

indoor

Adult width:

40 cm

Light:

full light

Watering:

normal

Product info

A real Brazilian plant like the Sinningia leucotricha will indeed be a conversation piece in your home. Its sturdy stalk grows straight up from the tuber, which lies partly above ground. From the top of the stalk a coronet of four large, whitish-green leaves will grow. When in flower a great number of trumpet-shaped, orange flowers will develop on top of this leafy coronet. A splendid sight to behold! Moreover taking care of the Sinningia leucotricha is really simple. Araflora is happy to explain in its plant care information section how the Sinningia leucotricha can be kept.

Height:

4 cm

Width:

3 cm

Adult height:

100 cm

Adult width:

40 cm

Flower period:

all year

Temperature winter:

5 °C

Product:

plant

Plant type:

flowering plant

Growth habit:

climbing

Properties:

special

Growth rate:

normal

Natural habitat:

South America

Altitude range:

0-1000 m

Plantcare

The *Sinningia leucotricha* likes a light spot and because of its reflective grey leaves, it can even tolerate some direct, bright sunlight. The potting soil of this species should be kept moist during growth and can be left to dry out when the tuber is at rest. This is possible because the *Sinningia leucotricha* stores water in its tuber. However, stagnant water near its roots is bad for the plant. Therefore let superfluous water drain from the bottom of the container. The *Sinningia leucotricha* prefers an ambient temperature of between 5° Celsius [41 F] and 35° Celsius [95° F]. The soil should be a light, permeable substrate, for example an Araflora mix of sand, peat and potting soil.

Care:
easy

Place:
indoor

Place:
container plant

Light:
full light

Light:
semi sun

Fertilize:
medium

Maintenance:
can be pruned

Watering:
normal

Watering tips:
not standing in water

Air humidity at day:
60-90%

Air humidity at night:
70-90%
