

Begonia maculata (Begonia74a)

Begonia maculata xl

€ 20.00

Begonia maculata is without doubt one of the most beautiful begonias. Many species have spots or blotches on their leaves but none are quite as dramatic or striking as this species. The undersides of its leaves are a dark purplish red, forming a dramatic contrast with the green upper surfaces. Begonia maculata produces large white flowers that grow in clusters on a single flower stem.

Plant type:

foliage plant

Place:

indoor

Adult width:

Light:

no direct sun

Watering:

normal

Araflora info

mini

Product info

Begonia maculata is a beautiful plant in every respect. It is also easy to cultivate. Its narrow, leaves have vibrant white spots that contrast dramatically with their olive-green surroundings. The undersides of the leaves vary in colour from red to purple. The two halves of the leaves are clearly asymmetrical. Begonia maculata produces clusters of more than ten white flowers that can be male or female with bright yellow stamens or pistils

Height:
18 cm

Width:
10 cm

Flower colour:
white

Flower period:
all year

Product:
plant

Plant type:
foliage plant

Plant type:
terrarium

Growth habit:
normal

Properties:
non-edible

Growth rate:
fast

Araflora info:

Araflora info:
discount

Altitude range:
500-1000 m

Plantcare

Begonia maculata is easy to care for either as a house plant or in a terrarium. Like many other begonias, it likes plenty of light. However, in summer its leaves must not be exposed to harsh, direct sunlight. A temperature of 20°C during the day and 15°C at night is best. If the plant is being grown in a pot, place it in a dish containing water in order to ensure the potting medium remains moist. Tepid (lukewarm) water is best for this purpose. Humidity needs to be around 70% during the daytime and 90% at night. Begonia maculata benefits from being fertilised regularly 2 or 3 times a month. A mixture of peat and another substrate forms a good growing mixture. See "Plant accessories" for more information about these and other useful products.

Care:
very easy

Place:
indoor

Light:
no direct sun

Light:
semi sun

Protection:
protect against rainfall

Fertilize:
medium

Watering:
normal

Watering tips:
standing in water

Soil type:
terrarium

Air humidity at day:
60-80%

Air humidity at night:
80-100%

Temperature
< 15 °C

Day temperature
10-30 °C

Night temperature
12-18 °C

Temperature max:
30 °C

Temperature min:
10 °C

Soil type:
peat mix

Repotting:
after 2 years
