

Orchid 'Bulbophyllum carunculatum' starter (Orchid248)

Bulbophyllum carunculatum

€ 19.62

The bright yellow flowers of the *Bulbophyllum carunculatum* make this orchid a real eye-catcher. Its black lip contrasts beautifully with the rest of the flower. The considerable orchid group of which this orchid is also part owes its name to the bulbs from which the leaves grow. These leaves are of medium size with an oval shape. In nature *Bulbophyllum carunculatum* can be found on Sulawesi.

Product info

Bulbophyllum carunculatum is a lowland species from Indonesia, where it grows in a tropical environment. It will need a similar environment at your home to flourish. This species will form multiple yellow flowers with a striking black lip. Unlike many other orchids, this lip isn't smooth. *Bulbophyllum carunculatum* forms bulbs from which oval leaves will grow.

Natural habitat:

North-East Asia

Altitude range:

0-1000 m

Plantcare

Bulbophyllum carunculatum prefers temperatures around 25°C. Make sure the temperature doesn't drop below 15°C or rise above 30°C. A humidity around 80% is important. It's best to keep this orchid in a light spot, while avoiding direct sunlight. Water Bulbophyllum carunculatum when its substrate is slightly dry. Use rainwater or distilled water to prevent the build-up of minerals in the rhizome. In practice this will mean watering three to five times a week. A proper airflow is needed to keep diseases and infection at bay. You can use orchid-mix as substrate. You can find this and other components in our 'Plant Accessories' section. Make sure moisture is able to drain from it. Old flowers can be cut off.
