

Sundew 'Drosera admirabilis' 'Starter' (CarniDr02a)

Drosera admirabilis 'Starter'

€ 5.95

The *Drosera admirabilis* is a remarkable carnivorous plant from the sundew family. It has rosette-shaped, succulent (fleshy) leaves, from which grows a rolled flower stalk, which looks like a tongue. These characteristics give *Drosera admirabilis* an even more animal-like appearance. Suitable for use on the windowsill or in a terrarium.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

full light

Watering:

high

Araflora info

introduction

Product info

The *Drosera admirabilis* originates from South Africa. Because of its subtropical origin, this sundew does not need to hibernate. It grows quickly and up to 10 cm. Like other members of the sundew family, it catches insects with the sticky tentacles on its leaves.
