

Huperzia (syn: Lycopodium) tetrasticha (Lyco15)

Huperzia 'Lycopodium' tetrasticha

€ 19.62

Huperzia tetrasticha has a highly distinctive appearance. More than other species of Huperzia it is reminiscent of the first land-based plants to inhabit the planet. Leaves grow profusely on the plant's stems, seeming to merge into a single visual whole. Huperzia tetrasticha owes its names to the density of its leaves which resemble the head of a drill. They have four distinct sides that meet in the middle.

Plant type:

foliage plant

Place:

indoor

Adult width:

5 cm

Light:

no direct sun

Watering:

normal

Araflora info

limited

Product info

Huperzia tetrasticha does well in a large terrarium or glasshouse where it will grow to a height of roughly one metre. It is essential to ensure that the pot or base is extremely secure, given that the plant will grow to this height and become extremely heavy in the process.

Height:
18 cm

Width:
5 cm

Adult height:
40 cm

Adult width:
5 cm

Flower colour:
none

Flower period:
all year

Temperature winter:
15 °C

Product:
plant

Plant type:
foliage plant

Growth habit:
creeping

Growth habit:
hanging

Properties:
special

Growth rate:
normal

Araflora info:
limited

Natural habitat:
North-East Asia

Altitude range:
0-1000 m

Plantcare

Huperzia tetrasticha does not require a great deal of attention. It needs watering every three days. Mix a few pebbles in the substrate at the bottom of the pot so that excess water can drain away easily. Good air circulation is also important in order to prevent rotting or infection. The ambient or room temperature should be between 15? C and 30? C accompanied by a high level of humidity. The best growing medium for Huperzia tetrasticha is peat or sphagnum moss to which fertiliser can be added from time to time. The plant needs plenty of light but must not be exposed to direct sunlight. It should not be pruned.

Care:
easy

Place:
indoor

Place:
artificial lighting

Light:
no direct sun

Light:
semi sun

Fertilize:
medium

Maintenance:
no-pruning

Watering:
normal

Watering tips:
free draining mixture

Air humidity at day:
60-90%

Air humidity at night:
80-100%

Air movement:
normal

Temperature max:
30 °C

Temperature min:
15 °C

Soil ph:
< 6-7 >

Soil type:
Peat/Sphagnum

Repotting:
after 2 year
