

Orchid 'Bulbophyllum eberhardtii' (Orchid370a)

€ 45.00

The striking *Bulbophyllum eberhardtii* orchid grows wild in mountainous areas of Southeast Asia. The species has a very distinct inflorescence. The flowers, attached to a central flower stalk, form a circle like an umbrella. The purple-pink and vanilla colored polka dot pattern on the flowers and stems make the *Bulbophyllum eberhardtii* even more eye-catching. *Bulbophyllum eberhardtii* is ideal plant for a hanging basket.

Product info

This orchid is found in southern China, Vietnam, Thailand and Myanmar. The leaves of *Bulbophyllum eberhardtii* grow from thickened bulbs that protrude just above the ground. The leaves are lanceolate and have a deep green color. The flower stems are about 20 cm long and produce circular flower heads with more than ten flowers each. The flowers have a relatively large lip. They are covered in a polka dot pattern that can range in color from purple to pink with white or vanilla.

Plantcare

Bulbophyllum eberhardtii grows best in a warm environment with a temperature of around 22°C and a humidity of around 80%. The orchid should be out of direct sunlight in a bright place with good air circulation. Water with rain or distilled water when the substrate dried up slightly. You can use orchid mix as a substrate for Bulbophyllum eberhardtii. You can find these and other growing supplies under our 'Plant accessories' section. This orchid does well in a hanging basket with good drainage. When the flowers have finished blooming, you can cut them off.
