

Venus flytrap 'Dionaea muscipula' 'Booby trap' (CarniVFT13)

Dionaea muscipula 'Booby trap'

€ 24.95

The *Dionaea muscipula* 'Booby trap' owes its special name to its resemblance to bear-traps. These traps have slightly curved teeth which make it even more difficult for the lured insects to escape. The *Dionaea muscipula* 'Booby trap' has its traps placed directly next to one another in the shape of a rosette. Within the traps of this Venus fly-trap a deep-red colour is visible which may continue up to and including the teeth.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

non-edible

Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height:

5 cm

Width:

5 cm

Adult height:

5-10 cm

Adult width:

10 cm

Flower colour:

white

Flower period:

Jan-July

Temperature winter:

5°C

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:

new

Growth rate:

slow
