

Zamioculcas zamiifolia 'Raven' (Botho195)

Zamioculcas zamiifolia 'Raven';

€ 34.88

A special variant of the well-known 'ZZ plant', with black leaves. The normal Zamioculcas has been known for years as one of the easiest houseplants there is and even though this cultivar 'ravens' looks a lot more unusual, it is just as easy! So easy, in fact, that it has been used for years by interior designers in homes or even in offices. Ideal for novice or advanced plant lovers thanks to the appearance of its almost black, glossy leaves.

Product info

The 'ZZ' plant is indigenous to Zanzibar, an island off the east coast of Africa. It is also called 'Zanzibar Gem'. Zamioculcas zamiifolia 'ravens' survive the harsh climate very well, it loves drought and then a large amount of water. The leaves grow on thick, fleshy stems that are about 60 cm long. They have a black colour and shine when the light falls on them.
