

Venus flytrap 'Dionaea muscipula 'Green voodoo' (CarniVFT34) Dionaea muscipula 'Green voodoo'

€ 15.17

The ominous name of the Dionaea muscipula ‘Green voodoo' shows how this Venus fly-trap species bedazzles insects with its alluring bright-green colour and its aerodynamic traps. These traps look almost too perfect, whereby one nearly forgets how deadly they can be for insects making for the colour and smell of the Dionaea muscipula ‘Green voodoo'. Its colour will stay green, although some red discolouration is possible if exposed to plenty of direct sunlight. Try to provide a permanently moist soil during the growth period of this Venus fly-trap, but reduce watering during the rest period: but above all take care that the soil stays moist.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

non-edible

Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height:
5 cm

Width:
5 cm

Adult height:
5-10 cm

Adult width:
10 cm

Flower colour:
white

Flower period:
Jan-July

Temperature winter:
5°C

Product:
plant

Plant type:
carnivorous

Growth habit:
normal

Properties:
new

Growth rate:
slow

Araflora info:

non-edible
