

Venus flytrap 'Dionaea muscipula 'Jaws smiley' (CarniVFT38)

Dionaea muscipula 'Jaws smiley';

€ 71.82

The Dionaea muscipula 'Jaws smiley' is a spectacular, distinctive Venus fly-trap mutant. Discovered a few years ago it owes its name to the mean sneer these traps seem to have. The teeth of the traps of the Dionaea muscipula 'Jaws smiley' develop at an almost perfect angle of 90 degrees as a result of which they grow diametrically opposite the teeth on the other side. This Venus fly-trap species produces plants of some 15 centimetres in diameter plus the striking traps of the Dionaea muscipula 'Jaws smiley' possibly some 5 centimetres in length.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

non-edible

Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height:
4 cm

Width:
5 cm

Adult height:
5-10 cm

Adult width:
10 cm

Flower colour:
white

Flower period:
Jan-July

Temperature winter:
5°C

Product:
plant

Plant type:
carnivorous

Growth habit:
normal

Properties:
limited

Growth rate:
slow

Araflora info:
non-edible

Plantcare

No plantcare information of Araflora available. The plantcare symbols below will give you an indication about the product. We hope to have text available soon.

Care:
normal

Place:
indoor

Place:
container plant

Place:
artificial lighting

Light:
full light

Artificial light height:
0-20cm

Fertilize:
none

Maintenance:
prune dead stalks

Watering:
high

Watering tips:
standing in water

Watering tips:
no-water spraying

Air humidity at day:
60-100%

Air humidity at night:
80-100%

Air movement:
normal

Day temperature
15-25°C

Night temperature
10-20°C

Temperature max:
30°C

Temperature min:
10°C

Soil ph:
< 6

Soil type:
peat

Repotting:
after 2 years
