

Venus flytrap 'Dionaea muscipula 'Jaws smiley' (CarniVFT38) Dionaea muscipula 'Jaws smiley'

€ 67.46

The *Dionaea muscipula* 'Jaws smiley' is a spectacular, distinctive Venus fly-trap mutant. Discovered a few years ago it owes its name to the mean sneer these traps seem to have. The teeth of the traps of the *Dionaea muscipula* 'Jaws smiley' develop at an almost perfect angle of 90 degrees as a result of which they grow diametrically opposite the teeth on the other side. This Venus fly-trap species produces plants of some 15 centimetres in diameter plus the striking traps of the *Dionaea muscipula* 'Jaws smiley' possibly some 5 centimetres in length.

Plant type:	Place:	Adult width:	Light:	Watering:	Araflora info

Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height: 4 cm		Width: 5 cm	
Adult height: 5-10 cm		Adult width: 10 cm	
Flower colour: white		Flower period: Jan-July	
Temperature winter: 5°C		Product: plant	
Plant type: carnivorous		Growth habit: normal	
Properties: limited		Growth rate: slow	
Araflora info: non-edible		Araflora info: limited	

Plantcare

No plantcare information of Araflora available. The plantcare symbols below will give you an indication about the product. We hope to have text available soon.

Care: normal		Place: indoor	
Place: container plant		Place: artificial lighting	
Light: full light		Artificial light height: 0-20cm	
Fertilize: none		Maintenance: prune dead stalks	
Watering: high		Watering tips: standing in water	
Watering tips: no-water spraying		Air humidity at day: 60-100%	
Air humidity at night: 80-100%		Air movement: normal	
Day temperature 15-25°C		Night temperature 10-20°C	
Temperature max: 30°C		Temperature min: 10°C	
Soil ph: < 6		Soil type: peat	
Repotting: after 2 years
