botanical

Product info

The Anthurium vittarifolium is native to Columbia. Here it grows deep in the humid rainforests, on the thin layer of forest soil or in cavities between branches of trees, with long aerial roots and the round, compact core, more leaves are collected in the cavities from which the Anthurium again benefits.

Height:
60 cm

Width:
20 cm

Adult height:
>200 cm

Adult width:
<30 cm

Flower period:
all year

Product:
plant plug

Plant type:
foliage plant

Plant type:
terrarium

Growth habit:
climbing

Growth habit:
epiphytical

Properties:
non-edible

Growth rate:
normal

Araflora info:
botanical

Natural habitat:
South America

Altitude range:
0-1500 m

Plantcare

Because this epiphyte comes from the tropics, it needs fairly stable conditions. Temperatures between 20-35°C and high humidity. Keep soil moist, so that while the plant is kept relatively wet, enough air can still flow around the roots. Indirect sunlight is ideal for Anthurium vittarifolium, in a greenhouse or living room.

Care:
very easy

Place:
indoor

Place:
artificial lighting

Light:
no direct sun

Light:
semi sun

Artificial light height:
20-40 cm

Fertilize:
little

Maintenance:
can be pruned

Watering:
normal

Watering tips:
free draining mixture

Watering tips:
water spraying

Soil type:
terrarium

Air humidity at day:
60-80%

Air humidity at night:
80-100%

Temperature
< 15 °C

Day temperature
10-30 °C

Night temperature
12-18 °C

Temperature max:
30 °C

Temperature min:
15 °C

Soil ph:
< 5-8 >

Soil type:
peat

Repotting:
after 2 years
