Product info

Sorry, no written information on this Araflora orchid plant. Additional information about this orchid will become available later. The symbols below will give you some indications for this orchid. We are working hard on adding valuable information as soon as possible.

Height: 5 cm		Width: 5 cm	
Adult height: 40 cm		Adult width: 10 cm	
Flower period: all year		Temperature winter: 10 °C	
Product: plant		Plant type: flowering plant	
Growth habit: normal		Properties: limited	
Growth rate: normal		Araflora info: botanical	
Natural habitat: Australia/ New Zealand		Altitude range: 0-1000 m	

Plantcare

The Phalaenopsis is one of the best orchids for cultivation indoors. This orchid needs a great deal of light but cannot be in the full sun. Once a week a little water is enough. It must not take too long for the water to be absorbed or else the roots could be damaged. This orchid can deal with any temperature between 15° and 30° Celsius [59° - 86°F]. A helpful hint from ARAFLORA on how to water the Phalaenopsis orchids : Water the plant when the orchids' roots are grey in colour. An hour after watering the roots will change from grey to green. A light-green colour is the colour you want.

Care: easy		Place: indoor	
Place: artificial lighting		Light: no direct sun	
Light: semi sun		Fertilize: medium	
Maintenance: can be pruned		Watering: normal	
Watering tips: free draining mixture		Watering tips: not standing in water	
Watering tips: water spraying		Air humidity at day: 60-90%	
Air humidity at night: 70-90%		Air movement: No-air movement	
Temperature max: 30 °C		Temperature min: 15 °C	
Soil ph: < 6-7 >		Soil type: mixed	
Repotting: after 1 year
