

## Venus flytrap &#039;Dionaea muscipula &#039;Short teeth&#039; (CarniVFT53)

Dionaea muscipula &#039;Short teeth&#039;;

€ 15.17

The *Dionaea muscipula* &#039;Short teeth' has- as the name already suggests- short, pointed teeth. In sufficient direct sunlight the traps develop a red inside and will grow to their maximum size. As with the other Venus fly-traps the *Dionaea muscipula* &#039;Short teeth' needs to rest in winter , so growth can start again at the beginning of spring: don't worry when leaves and traps die off in the winter!

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

non-edible

### Product info

Sorry, no additional information on this Araflora plant. Additional information about this plant will become available later. The symbols below will give you some indications for this plant. We are working hard on adding valuable information as soon as possible.

Height:

4 cm

Width:

4 cm

Adult height:

5-10 cm

Adult width:

10 cm

Flower colour:

white

Flower period:

Jan-July

Temperature winter:

5°C

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:

special

Growth rate:

slow

Araflora info:

non-edible

Araflora info:

botanical

## Plantcare

No plantcare information of Araflora available. The plantcare symbols below will give you an indication about the product. We hope to have text available soon.

Care:  
normal
