

## Narrow strapfern *Campyloneurum angustifolium*; XL; (Fern12)

*Campyloneurum angustifolium*; XL;

€ 25.45

*Campyloneurum angustifolium* commonly known as the narrow strap fern or narrow-leaf strap fern, is a fern species characterised by a profusion of shiny, dark-green leaves that seem to reflect the light. This fern is easy to cultivate on a window sill or in a large terrarium. It retains its attractive, slender leaves throughout the seasons and can therefore be enjoyed at any time of year.

Plant type:

terrarium

Place:

indoor

Adult width:

40 cm

Light:

semi sun

Watering:

normal

Araflora info

limited

### Product info

*Campyloneurum angustifolium* is an exotic fern, widely distributed throughout Central and South America. It can also be found in the southern tip of North America. At first sight, it closely resembles the shoestring fern, but it is much easier to cultivate. It has shorter and smaller leaves than the Florida strap fern so is easier to position in a relatively small space such as on a windowsill, a side table or in a terrarium.

Height:

10 cm

Width:

5 cm

Adult height:

100 cm

Adult width:

40 cm

Flower colour:

none

Flower period:

all year

Temperature winter:

5 °C

Product:

plant

Plant type:

terrarium

Growth habit:

creeping

Properties:

special

Growth rate:

normal

Natural habitat:

South America

Altitude range:

0-1000 m

## Plantcare

Campyloneurum angustifolium prefers half shade or full shade and should not be exposed to direct sunlight. It needs to be watered regularly and fed from time to time. It will do well under artificial light. The roots of Campyloneurum angustifolium must be kept moist at all times but it must never be left standing in water.
