

Epipremnum pinnatum Cebu Blue (Ariods262)

Epipremnum pinnatum Cebu Blue

€ 41.00

A unique variation of the well-known houseplant 'Pothos' with dark blue leaves: in the wild this variation only grows on the Filipino island of Cebu. The color of the leaves looks a bit like ivy and because this vine has pointed leaves it is also called 'Devil's ivy'.

Plant type:

evergreen

foliage plant

Place:

indoor

Adult width:

<15 cm

Light:

no direct sun

Watering:

normal

Product info

In its youthful form this plant has dark blue arrow shaped leaves. If this plant doesn't get the chance to climb, but can just hang and crawl, it will remain in this beautiful youth form forever. When 'Epipremnum pinnatum' does have the opportunity to climb, it will grow adult leaves, similar to the Monstera deliciosa (Swiss cheese plant).

Height:

20 cm

Width:

10 cm

Adult height:

>100 cm

Adult width:

<15 cm

Flower colour:

?

Flower period:

all year

Product:

plant

Plant type:

foliage plant

evergreen

Plant type:

terrarium

Growth habit:

creeping

Growth habit:

epiphytical

Properties:

non-edible

Growth rate:

slow

Natural habitat:

South America

Altitude range:

0-1500 m

Plantcare

This houseplant likes an airy, nutritious soil. This powerful plant grows fast and will need to be repotted or pruned in time. This plant is not really picky about light, shade or full sun, as long as it is not too close to the window, it can all be done. Sometimes smaller stems can produce smaller leaves, until they eventually grow as bare stems, in the wild the plant then looks for something to climb up. If you cut the plant back it will grow beautiful stems with leaves again.

Care:
very easy
